

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

by Dr. Hartert in a later number (No. 7, December, pp. 208-222) in a paper entitled 'On Birds represented in the British Isles by peculiar forms,' twenty-two in number, the history and the characters of each of which are presented.

There are also continued papers running through several numbers each, as 'Nesting Habits observed abroad of some Rare British Birds,' by F. C. Selous; 'On the More Important Additions to our Knowledge of British Birds since 1899,' by H. F. Witherby and N. F. Ticehurst; 'Nestling Birds and Some of the Problems they present,' by W. P. Pycraft; 'Wind and Flight,' by F. W. Headley, etc. Each number contains also several pages of 'Notes,' and a number of reviews of new books and papers. There are also memoirs of Professor Alfred Newton, by Dr. Sharpe, and of Howard Saunders, by Abel Chapman, each with a portrait.

As shown by the foregoing, there was evidently a field for a magazine like 'British Birds,' and, furthermore, that the field is now excellently filled by this new Journal.—J. A. A.

Godman's Monograph of the Petrels.¹—Part I of this beautiful monograph treats of 24 species, of which 20 are figured, belonging to the genera *Procellaria*, *Halocyptena*, *Oceanodroma*, *Garodia*, *Pelagodroma*, *Pealea*, and *Cymodroma*. The synonymy and bibliographical references are followed by a Latin diagnosis, a fairly full biography, and by an account of the various plumages of the species. The subject seems to be brought well up to date, both as to the technical and biographical details.

It may be noted that *Oceanodroma socorroensis* Townsend, 1890, is referred to *O. monorhis* Swinhoe, 1867, and that *O. monorhis chapmani* Berlepsch, 1906, is not considered as separable from *O. monorhis* after an examination of the types, kindly submitted to the author of the 'Monograph' for study. On p. 9, *O. beldingi* is evidently a lapsus for *O. beali*.

This useful work is a most welcome and important contribution to the literature of these little-known birds. As we have already announced (*antea*, p. 105), the 'Monograph' is to be issued in five quarterly parts, and will contain over 100 hand-colored plates.—J. A. A.

Mathews's 'Handlist of the Birds of Australasia.'²—This is stated by the author to be preliminary to his proposed work 'The Coloured Figures

¹ A | Monograph | of the | Petrels | (order Tubinares) | By F. Du Cane Godman | D. C. L. F. R. S. President of the British | Ornithologists' Union etc, etc. | With hand-coloured Plates | by J. G.
